PRODUCT FEATURES

Lithium-ion technology

ICE 301B/ICE 351 adapts LFP Li-ion battery that prevents the battery from self-ignition and ensures safety operation. ICE 301B/ICE 351 supports opportunity charging so it can be charged at preferable time during the day without disrupting working schedules.

Low TCO

Comparing to a diesel forklift truck, ICE 301B/ICE 351 saves 30%-50% of energy cost with li-ion technology. And there is no maintenance fee with no air filter, oil filter, engine oil or starter battery installed on the truck.

Easy driving

The truck is equipped with electric-hydraulic braking system. The system shortens the braking distance to ensure safety while reducing the driving fatigue in the mean-time.

Brilliant visibility

A wide view mast ensures good visibility during operation. This enables operator to better monitor the status of the cargo.

Telematics

ICE 301B/ICE 351 offers EP' s latest Telematics. It provides the following features to facilitate your feet management:

- Truck location in real-time
- Reports of truck usages and diagnosis
- Li-ion battery condition analytics
- Updates on card access registration
